

Here's what it looks like when you're finished!

# St Olave's Fritwell

Make your own church

Stick the altar area on here.

reverse fold

Porch

leave flat (goes under altar area)

## Tools you'll need....

1. Scissors (or a craft knife)
2. Glue (A hot glue gun works best, otherwise PVA)
3. A chopping or cutting board
4. A ruler

Remember - if you're a child, you must have help with the cutting and glueing from a grown up.

reverse fold

Main Building Roof

South porch can be added on here

### Instructions...

There are 3 main parts to the church. The main building section here, and the tower and altar area above.

An optional add on of the south porch is also included.

Step 1. Cut out the templates as accurately as possible. Include the tabs.

Step 2. Score the crease lines where you will fold the parts to make the church

Step 3. Glue each section together using glue before glueing sections together.

Hints - Take your time. Ensure glue has thoroughly dried before moving on to the next join. Crease all bends before trying to glue together.

leave flat (goes under tower)

Idea!! There's a really faint rectangle on this roof section. Consider cutting it out or just making a slot, and the church will become a money box, or you could use it to collect for the church roof!
